

## SALUTE TO PHYSICIANS

### **ANESTHESIA PAIN CARE CONSULTANTS**

#### ***Ira Fox, MD, DABPM, FIPP, ABIPP***

Ira Fox, M.D., DABPM, FIPP, ABIPP, of Anesthesia Pain Care Consultants, offers stem cell therapy for chronic pain patients suffering from joint, disc, nerve or soft tissue pain. Stem cells are delivered through injections on an outpatient basis to help repair damaged or degenerated tissue.

The process utilizes a mini liposuction procedure under local anesthesia. Dr. Fox withdraws fat tissue and processes the material to isolate stem cells. He then relocates and injects the cells into the area of pain or inflammation. Dr. Fox has had excellent outcomes with chronic pain patients who did not respond to other traditional therapies.
